DETAILED ACTION

Introduction

1. The continuation data in this application is incorrecte since the application No. 09/585,741, now Patent No. 6,697,043 is not a continuation-in-part of application No. 09/456,887, now Patent No. 6,211,861 since there is no common inventor in these two applications(see MPEP201.08).

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species:

The species are as follows:

Species I, figures 1-3b, 13-14;

Species II, figures 3d, 13-14;

Species III, figures 4-5c, 13-14;

Species IV, figures 6-14;

The species are independent or distinct because the actuator assemblies are different and distinct from each other in Species I-Species IV and have acquired a separate status in the art due to their recognized divergent subject matter.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
